

BULK BAG UNLOADER—OPTIONAL ADD-ONS

FEATURES SHOWN:

- *Vibrating Tray Module* handles a variety of bulk bag types—spouted and unspouted
- *Surge Hopper* increases available ingredient storage capacity, allowing operators more time to change out empty bags
- *Rotary Valve* provides an airlock and meters flow to downstream components and into a pneumatic transfer system
- *Delumper* assembly breaks down product lumps that may form within the bulk bag
- *Scalping Sifter* screens off any potential contaminant that would otherwise transfer to your downstream process
- Many more options available, including:
 - Integral bag dump
 - Weighing systems
 - Integral or remote dust collection

THINK DIFFERENTLY.
