

HORIZONTAL PIPELINE

The SANITARY magnet to extract magnetics from blow, vacuum or pressure lines conveying dairy powders or liquids in horizontal or sloping lines.

USES

- Powders & liquids with up to 0.6" (16mm) particulate.
- Horizontal or sloping pipelines 1"-6" (25mm - 152mm)
- Styles to suit abrasive powders and liquids.
- Styles for self minimisation of magnet wear.
- Designed for CIP cleaning.

Inlet / outlet fittings; plain butt or customers choice (Purge welded)

No ponding of product or CIP fluids

RARE EARTH MAGNETIC SEPARATION TECHNOLOGY

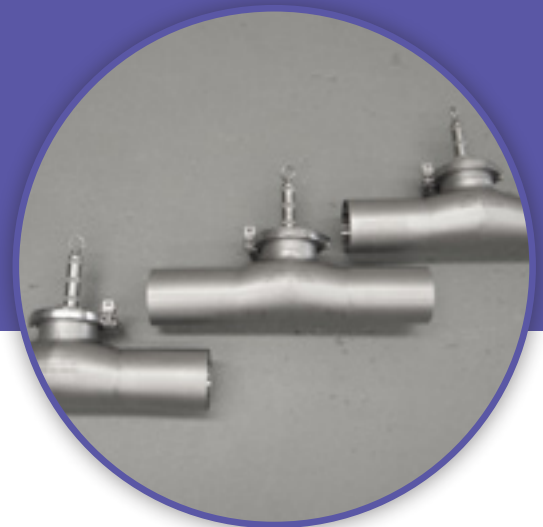

Fully designed and manufactured by MAGNATTACK™ Global.

HORIZONTAL PIPELINE

EFFICIENT & HYGIENIC CONTAMINANT RETENTION

BENEFITS

- Sanitary 316 SS food grade to current hygiene standards.
- RE80™ magnetics with vacuum resinizing for longer strength life.
- Improved separation efficiency in horizontal pipelines.
- Single top entry magnet (multiple top entry units available).
- 10 - 11,000 gauss magnetic strength with extra high gauss on the base of the magnet where the most dangerous magnetic fragments are most likely to be found in horizontal and sloping installations.
- Eccentric housings prevent 'ponding' of dead material.
- Pressure certificates available.
- Certified >RA-1 Surface Roughness available.
