

# MAGNATTACK™

## POWERFUL MAGNETIC MAT

HACCP International  
Endorsed

### CONTROL HAZARDS, REDUCE RISK, INCREASE AWARENESS

Stop metal fragment transfer of ferrous metals within sensitive processing and workshop areas exit and entry points.

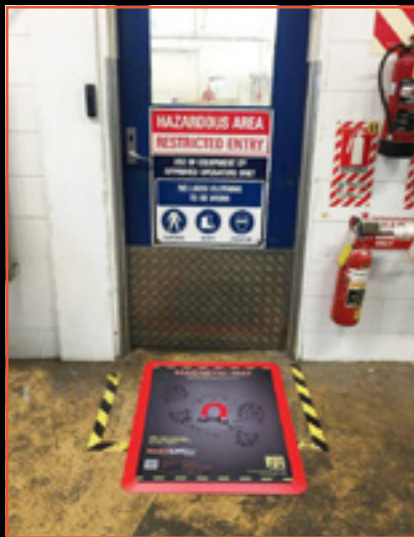

Metal fragment trap mats supplied are easily cleaned and treated with anti-soiling solution to maximize hygiene and mat life.

Designed with a durable polyurethane ramp surrounding the assembly to prevent a trip hazard.

Simply place at exit of workshops or maintenance areas or at entry of production areas.

EASILY INSTALLED  
EASILY CLEANED & MAINTAINED  
INCREASE FOOD SAFETY CONTROL  
EXCELLENT FOR CONTINUOUS IMPROVEMENT PROGRAMS

- Retains work hardened stainless steel fragments, swarf and magnetic stone chips.
- Overall size: 35" x 27" (895 x 690mm)
- Certified Magnetic Strength
- Anti-Soiling
- Contains RE80™ Magnetics
- Certified and endorsed by HACCP International
- Currently appreciated by major food industries in Australia, New Zealand, USA, Canada & UK
- Keep sensitive areas metal free.

#### INSTALLATION

Simply place the non-skid base component on the floor then lay the ramp and mat over the top.

#### QUICK CLEANING FEATURE

Simply lift off the top mat and clean it away from the base component. Broom or shake off magnetics or remove from the mat with a magnetic broom or mat cleaning tool.

Fully designed and manufactured by MAGNATTACK™ Global.

# MAGNATTACK™ SHUFFLE MAT

HACCP International  
Endorsed

## NEW DIMPLE-MAG™ TOP MAT

Effectively captures most magnetic shavings, slivers, swarf, shards, stainless steel rust, fine wear iron, magnetic stone, work hardened stainless steel fragments, wear particles and designed to assist in the removal of other potentially harmful substances.

- Low cost
- Effective RE80™ power
- Waterproof & hygienic
- Overall size: 21" (535mm) diameter
- Lightweight: 17 lb (8 kg)
- Optional RE80™ Magnetic Roller, cleans removed top mat in 10 seconds
- Better cleaning of under shoes and boots due to hundreds of reinforced polyurethane dimple nodules, moulded into the long wearing polyurethane top mat.

EXIT WORKSHOPS AND WORK AREAS  
FOR THE PREVENTION OF DANGEROUS METAL  
FRAGMENTS FROM ENTERING SENSITIVE PROCESSING & WORKSHOP AREAS.
