

# >> VIBRATING SIFTER

## >> FEATURES:

- Sanitary design meets USDA Dairy standards
- Single and multi-deck models available
- Screen areas range from 5.4 to 53.8 ft<sup>2</sup>
- Screen openings 50 mesh or larger
- Screen changed without tools or hoists
- Extra large access ports simplifies routine inspection, maintenance & cleaning
- Heavy duty, maintenance-free design
- Energy efficient, low horsepower requirements
- Extremely quiet operation

## Principal of Operation

Vibrating sifter provides higher throughputs per square inch of screen than styles using circular sifting action.

Gentle screening action is ideally suited for friable, agglomerated and instantized product where degradation is unacceptable.

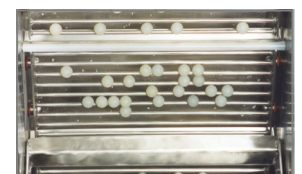

Screens are lighter than conventional designs and can be changed quickly without tools by one person in just a few minutes. Product contact surfaces are easily accessible for cleaning.

## Optional Ball Cleaning Tray

Easy one step screen tightening assures a uniform aperture over the entire surface, increasing screen longevity and flatness.

Ball cleaning tray
